*Faulkton Area
Medical Center*

*Community
Health Needs
Assessment*

EXECUTIVE SUMMARY

Faulkton Area Medical Center is dedicated to best serving the medical needs of the community with the resources available to the facility.

Mission Statement: The goal of the Faulkton Area Medical Center is to provide the appropriate level of healthcare on the continuum for clinic and outpatient/outreach care, emergency care, routine inpatient care, skilled swing-bed and intermediate swing-bed.

Faulkton Area Medical Center conducted a Community Health Needs Assessment (CHNA) for the residents of Faulkton and the communities included in Faulk County. The cities and towns that are in Faulk County are Chelsea, Cresbard, Faulkton, Miranda, Norbeck, Onaka, Orient, Rockham, Seneca, Wecota and Zell. The information and data obtained through the CHNA provides direction for prioritizing future strategies and collaboration to develop community driven goals.

The process to gather information included a community survey that was available at various locations throughout the county, focus groups and individual interviews. The surveys and data collection for the CHNA began in early 2012.

The objectives were:

- To recognize health related concerns of community leaders and members.
- To classify common themes that can be prioritized for follow up.
- To develop strategic plans that can be committed to with action from Faulkton Area Medical Center and community collaboration.
- To devise appropriate skills and programs to improve the health and lives of our community and the members.

Anonymous surveys included designed questions with the participant choosing the appropriate response that described their age, gender, zip code, education, past general health history, race, home, neighborhood and community. Additional optional questions were as follows:

- What do you think is healthy about our community?
- What do you think is unhealthy about our community?
- What do you think is the most pressing health care related need for you, your family or our community?
- In what ways do you think the hospital is serving the community well?
- Do you see community members working together in collaboration to address community health needs?
- What is the number one thing the hospital could do to improve the health and quality of the community?

A total of 378 surveys were collected either electronically or manually.

HISTORY

Dr. Abbie Ann Jarvis, in 1898, was the first woman licensed to practice medicine in the state of South Dakota; as well as the first registered pharmacist in 1895, and had a pharmacy in Faulkton, SD. She moved to Faulkton during the winter of 1888, where her father was the local physician. She shared her father's dream of providing health care to people and pursued that dream up to her death in May of 1931.

For approximately 34 years (1917 – 1951) patients were cared for at Providence Hospital, a frame building that was located on the same lot as the past, Faulkton Medical Clinic. The Faulk County Commissioners had unending efforts which resulted in a new brick structure in 1949 and opened to patients in 1951. Bond issues and Hill-Burton funds were the main channels for the secure financing and building of the hospital. In 1966, a large addition and remodeling project was started and completed in 1968, with the birth of the Faulk County Memorial Hospital (FCMH) being a modern 34-bed facility.

In 1983, Presentation Health System began leasing the hospital, and in 1984 the hospital entered a management agreement with the Presentation Health System, now known as Avera. This partnership continued until FCMH again became an independent facility in the fall of 1993. A new clinic, which was a separately funded and an incorporated facility, was attached to the south end of FCMH, and opened in May 1992.

In September 1993, FCMH was certified as the first Rural Primary Care Hospital in the nation. The hospital was licensed for twelve beds; six acute care and six swing beds. Beginning in late 1994, the hospital/clinic was managed by some private companies including Lutheran Health Systems of Fargo, ND followed by Tealwood Care Center of Mpls, MN. In 1998, the hospital/clinic's classification again was changed. It was now determined to be a Critical Access Hospital and Rural Health Clinic. Once again, in August 2000, the facility became solely independent and continued to operate with the 12 licensed beds.

In 2004, Faulk County Memorial Hospital/Clinic became the only institution in South Dakota to receive funding through a combination of loans and grants to build a completely new facility. FCMH/C was one of only 32 facilities in the nation to obtain this highly sought after funding. In the same year, the Foundation Board was founded and launched a major fundraising campaign in April 2006, for the purpose of obtaining medical equipment, upgrade technology and establish an endowment for the benefit of the hospital and clinic.

In June 2007, the new facility was completed and officially named Faulkton Area Medical Center (FAMC). Located on the southwest edge of Faulkton, all related health facilities were physically joined together. FAMC is connected by a hallway to the Faulkton Healthcare Center (nursing home) and The Meadows (assisted living). The nursing home and assisted living facilities are owned and operated by a private corporation. FAMC continues to be governed by an independent, local board of directors.

DEMOGRAPHICS - COMMUNITY SERVED

Faulkton Area Medical Center defines its primary service area as Faulk County. According to the 2012 census, there were 2,377 people residing in Faulk County. This is 10.5% less than the population in 2000. The Faulk County population density is 2.35 people/sq. mile; which is much lower than the state average of 10.56 and the national average of 81.32 people/sq. mile. The prevailing race is white, which represents 98.94% of the total population. The average education level is lower than the state and national average.

Faulkton is the largest city and the county seat for Faulk County. The other towns/communities that are included in Faulk County are as follows:

| | |
|-----------|----------|
| Chelsea: | Pop. 27 |
| Cresbard: | Pop. 104 |
| Faulkton: | Pop. 736 |
| Miranda: | Pop. 12 |
| Norbeck: | Pop. 5 |
| Onaka: | Pop. 15 |
| Orient: | Pop. 63 |
| Rockham: | Pop. 33 |
| Seneca: | Pop. 38 |
| Wecota: | Pop. 14 |
| Zell: | Pop. 50 |

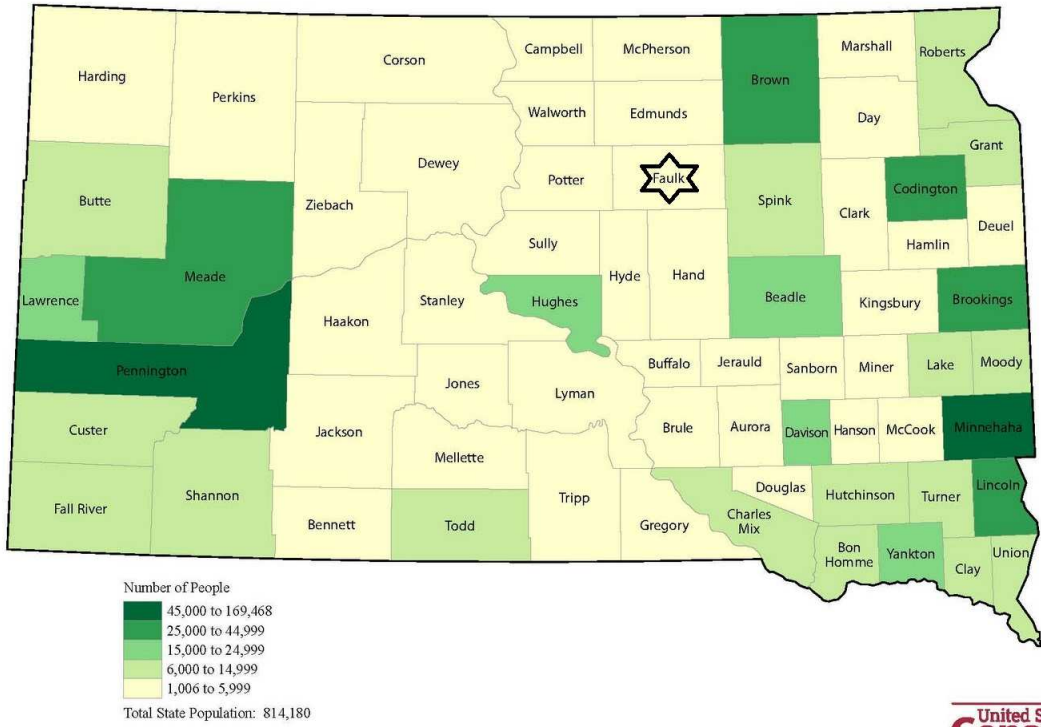

There are also four Hutterite colonies that are within a 25 mile radius of Faulkton, which many chose Faulkton Area Medical Center to provide services to their families and members. They are Thunderbird, Evergreen, Brentwood and Blumengard colonies.

85% - 90% of Faulkton Area Medical Center admissions are residents from Faulk County; and hospital discharge totals have ranged between 305 – 355 annually over the past three years.

FAMC operates a satellite Rural Health Clinic in Hoven, SD that provides primary care services three times per week by the FAMC providers.

- Faulk County Ambulance
- Faulkton Healthcare Center and Meadows – Assisted Living
- Business & Professional Association
- Faulk County Record
- Faulk County Community Health Office
- Faulkton Area Economic Development
- Faulkton City Pool

DATA ASSESSMENT ANALYSIS

What do you think is healthy about our community?

- Health services, growing community, community center, pool, park, availability of physical activities for all ages, low crime, good law enforcement, caring and helpful people, programs offered by our medical facility, community involvement, post office, grocery store, expert medical care and family orientated.

What do you think is unhealthy about our community?

- Transportation for the elderly, older properties, housing for elderly, lack of affordable housing, drugs, under-age drinking, alcohol abuse, obesity, lack of employment opportunities, stray cats and dogs, chemical use and lack of walking/bike trails.

What do you think is the most pressing health care related need for you, your family or our community?

- Obesity in youth, wellness awareness, home health care, EMT's, kidney dialysis, transportation for elderly, affordable eye care, cost of healthcare, hospice, allergy doctor, health insurance, pediatric care, availability of services, extended office hours, diabetes education, prescription drug costs, assisted living space, chemotherapy and weekend urgent care.

In what ways do you think the hospital is serving the community well?

- Not having to drive 60 miles or more for healthcare, easy to get an appointment, many wellness opportunities, great providers, very friendly and efficient staff, new building, providing excellent care, outpatient services, therapy, knowledgeable professionals, convenience, close to community, 24 hour services, great staff, not having to go out of town for healthcare, education, providing excellent inpatient and outpatient care, quality of care, knowing patients personally, outreach services, dietician, information posted in newspaper, rehab services and excellent ambulance service.

In what ways could the hospital improve the way in which it serves the community?

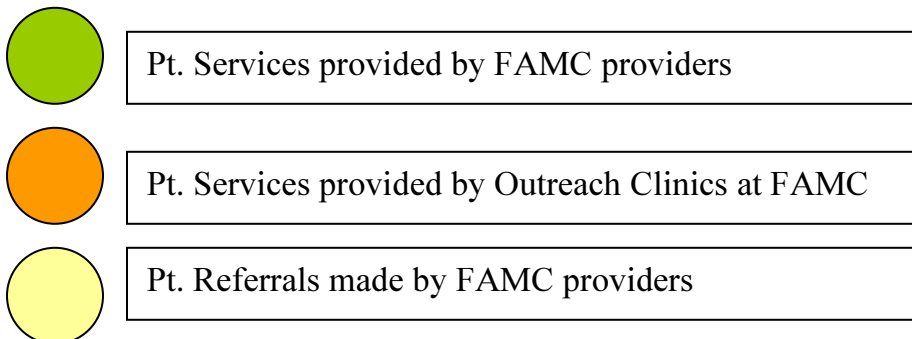

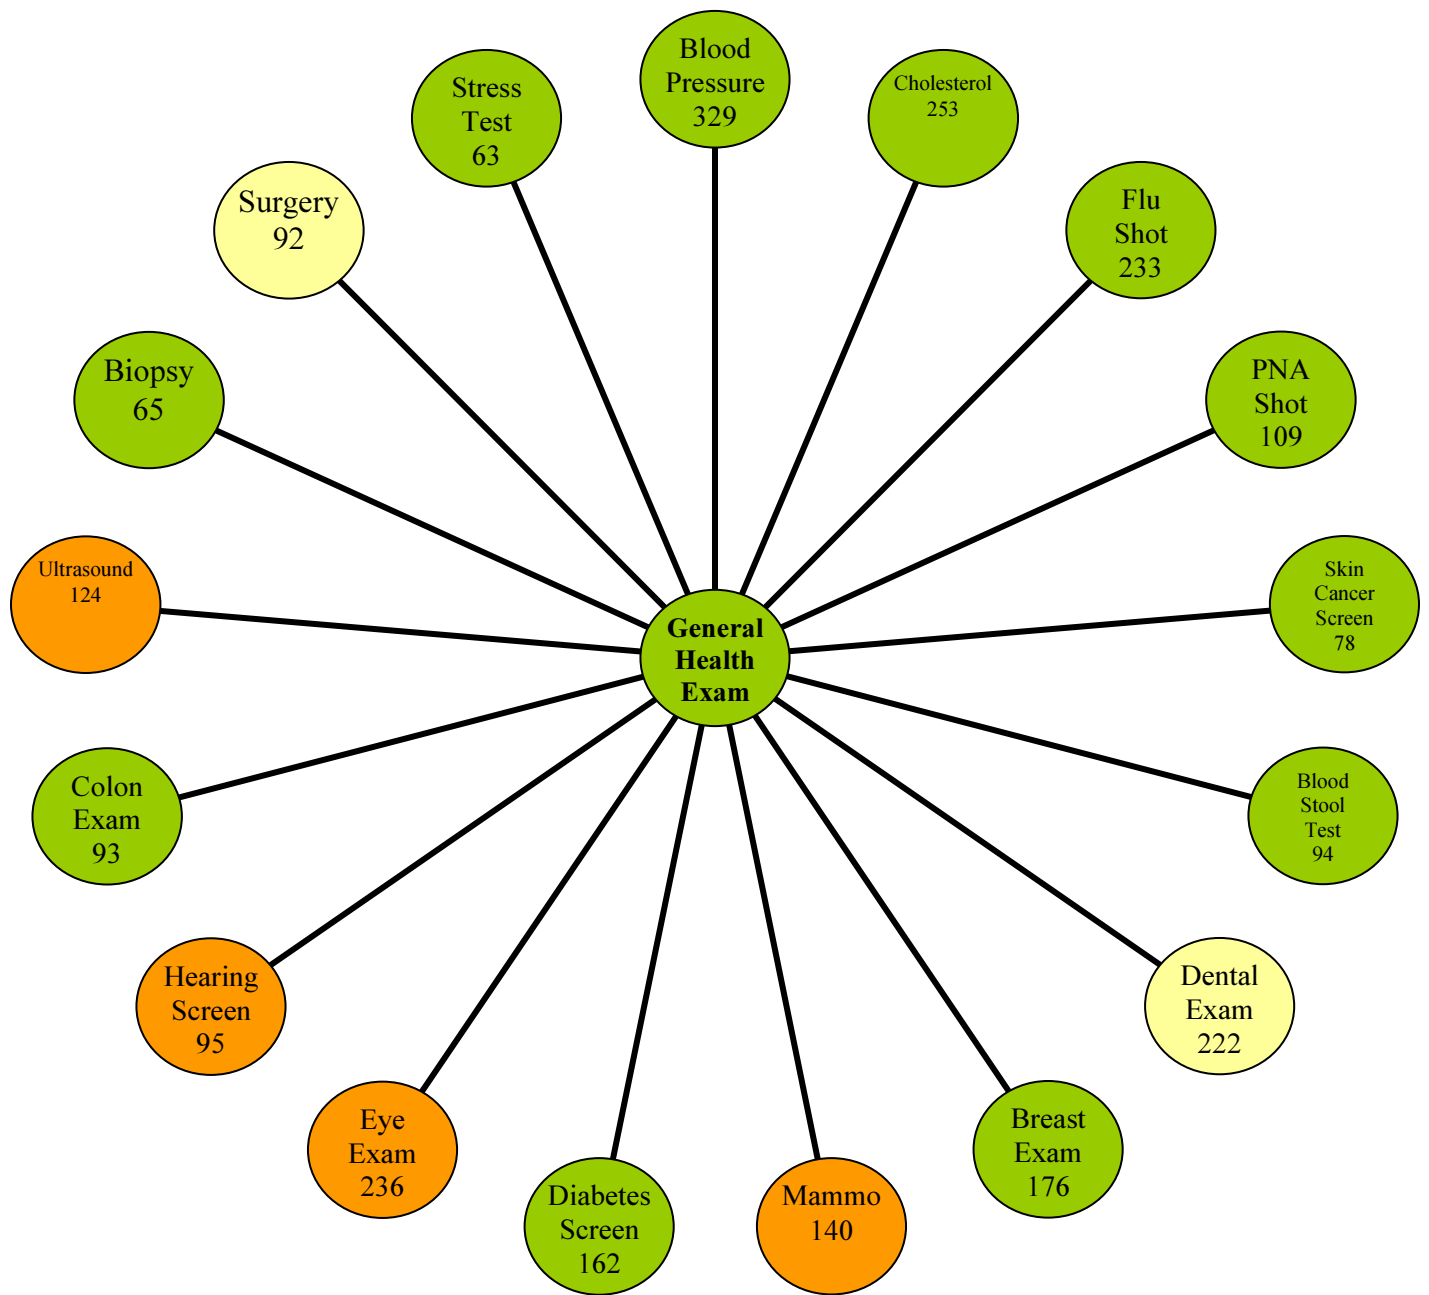

- OB/maternity care, home health care, mental needs care, indoor pool for exercise, transportation to appts., social service programs, pediatric care, lower cost of services, health & exercise geared towards men, extend clinic hours, doing VA labs, optometrist, cancer support group, baby well checks, cancer care and treatment, flower shop and nutrition programs.

What services do you feel are needed in our community that currently do not exist?

- Dialysis, home health, transportation, youth center, pediatrics, OB care, hospice, clinic weekend hours, endocrinology, awareness programs, community bus, eye doctor, chemotherapy, massage therapy, allergy doctor, dermatologist, cancer treatment, mental health services, radiation, surgery, domestic violence support, maternity/delivery, provide daycare for employees, fitness classes for kids and walking trails.

This chart identifies the **number** of people who selected the various healthcare procedures/exams/referrals in the past 12 months.

Refer to page 8 for a complete listing of services that are available through Faulkton Area Medical Center.

COMMUNITY HEALTH NEEDS IDENTIFIED

Faulkton Area Medical Center has many of the listed programs and services in place to help meet many of the suggestions on the CHNA surveys. This assessment was very useful and helpful in understanding the community and surrounding areas perceptions of FAMC and healthcare. It assisted our focus groups and committee to determine and support the needs identified by the community of Faulk County and surrounding area.

The leading concerns and needs that were identified and prioritized from the data collected in the surveys are:

- 1) Home Health Care/Hospice
- 2) Chemotherapy/Cancer treatment
- 3) OB/GYN services
- 4) Transportation for the elderly

IMPLEMENTATION STRATEGY

Our implementation strategy will focus on all aspects of the highest priority of needs that best accommodate our community.

1) Home Health Care/Hospice: This service is not currently offered by FAMC. There is a substantial amount of requests and reference to our facility being able to provide this service to our community. There needs to be more research completed to determine patient count, the service area, current services available and guidelines established. There will be a designated committee to investigate and follow-up on the need of Home Health Care/Hospice services.

2) Chemotherapy/Cancer Treatment: Currently this service/treatment is being researched and in the initial planning stages of adding chemotherapy administration to the existing outpatient center. The program requirements, progress and utilization of services will ultimately determine the expansion plans for the future.

3) OB/GYN: During the CHNA survey process, Dr. Jessica Dickes, was contacted and secured in doing an outreach clinic once a month at the FAMC clinic. If needed she may be available for additional clinic hours as time progresses. She will be traveling from Aberdeen, SD to do patient care and education for OB/GYN.

4) Transportation for the elderly: Approximately 24% of Faulk County is age 65 and older. As the population continues to have a longer life expectancy, transportation and safe travel will undeniably become a desirable asset to any community. This program was originally evaluated by the Faulkton Development Corp. It remains in the initial stages and additional research needs to be completed. Success of this program will require collaboration on several of the community partners for financial support and program requirements.

As the needs of our community change, we will review our methods of education, programs and services to raise awareness and fulfill the needs of the community.

BOARD APPROVAL

This Community Needs Health Assessment, a requirement of the IRS, has been conducted to determine and assess needs through data collection and collaboration with community leaders and members, along with the mission statement of Faulkton Area Medical Center to improve the health of people in Faulk County and surrounding areas. This process provides direction for prioritizing our future strategies in developing community driven goals.

This report was prepared for the fiscal year dated March 1, 2013 – February 28, 2014
